Designated States (Regional): BE DE ES FR GB IT NL

DE 19621308 A1 5 C08L-077/00

Abstract (Basic): EP 810259 A

Thermoplastic moulding material (M) comprises (A) polyamide and (B) nano-disperse filler chosen from (quasi-)metal (hydrated) oxides. Also claimed are (i) moulding materials prepared from (M), (ii) single- or multi-layer films or hollow articles made from (M), (iii) packaging made from these films or articles, (iv) the preparation of (M) by incorporating (B) during the polymerisation of (A) and (v) the use of (M) for making moulded products; single- or multi-layer films or hollow articles.

USE - The films and hollow articles are used as packaging for food (eg. meat (products), sausage, cheese or drinks), cosmetics (eg. sun protection cream) or chemicals (eg. pesticides). The hollow articles can also be pipes or tanks for eg. motor car fuel or oil.

ADVANTAGE - Oxygen barrier properties of polyamide are improved without an adverse effect on transparency, reflection or toughness.

CA 2205974 A C08K-007/10

KR 97074829 A C08J-005/00

Abstract (Basic): EP 810260 A

Single- or multi-layer film, or hollow article contain at least one
polyamide layer containing finely dispersed fluoro mica.

Preferably the polyamide layer contains 0.1-10 (1-3) wt.% fluoro
mica with an average particle size at most 1 μ m, (at most 50 nm).
Fluoro mica of formula $x(\text{MF}) \cdot y(\text{aMgF}_2 \cdot \text{bMgO}) \cdot z\text{SiO}_2$ (I) is used. In (I), M
= alkali metal; a, b = 0-1, with the provision that (a + b) = 1; x =
0.1-2; y = 2-3.5; and z = 3-4.

USE - The films and hollow articles are used as packaging for food
(eg. meat (products), sausage, cheese or drinks), cosmetics (eg. sun
protection cream) or chemicals (eg. pesticides). The hollow articles
can also be pipes or tanks for eg. motor car fuel or oil (claimed).

ADVANTAGE - Oxygen barrier properties of polyamide are improved
without an adverse effect on transparency, reflection or toughness.
